FEATURES

1. **ON/OFF Reset Control Switch and Circuit Breaker**
Controls power to all outlets. The switch is also a 15A breaker. When an overload occurs, it will automatically switch off. To resume operation, ensure the overload condition is removed and reset the surge protector by switching the unit ON.
2. **Grounded LED Indicator**
Illuminated when a properly grounded AC outlet is detected.
3. **Protected LED Indicator**
Illuminated when the surge protection feature is working properly.
4. **Safety Covers**
All outlets on this surge protector include safety covers. To ensure the safety of children and to avoid electric shock and damage from a high-dust environment, slide the plastic outlet cover over outlets that are not used.
5. **Four Wide-Spaced Outlets**
Easily plug in large chargers without interfering with the other outlets.
