Tools Needed:
Screw Driver
Step 1 - Attaching the 4-Post Extension L Brackets

Only for 4-Post Rackmount Keyboard Tray and Extension Kit

a) Pull the keyboard forward to provide more room in the back of the tray.

b) Using the included 10-32 Cross Head Screws, secure the Extension L Bracket to the rear of the keyboard tray as shown.

c) Repeat on the other side.

Step 2 - Mounting the Keyboard Tray Assembly

a) Using rack screws (not included) mount the Keyboard Tray on to your front rack rails as shown

b) For the 2-Post Keyboard Tray this completes the assembly.

c) For the 4-Post Keyboard Tray and the Extension Kit please continue to Step 3.

*compatible with both cage nut and tapped style rails

Step 3 - Installing the Extension Rails to the Rear Rails

Only for 4-Post Rackmount Keyboard Tray and Extension Kit

a) Attach the Extension Rails to the rear rack rails using rack screws show in Figure 1.(not included)

b) Please note the Extension Rails will slide inside the Extension L Brackets as shown in Figure 2.

Figure 1

Figure 2

Step 4 - Secure Extension Rails to Extension L Brack-

*Only for 4-Post Rackmount Keyboard Tray and Extension Kit

a) Secure the Extension Rails to the Extension L Brackets (Figure 1) using the 10-32 Cross Head Screws provided.
